Excellent! Are you presenting any work at the ACS virtual meeting next month?

Cheryl

[Actual Sender is Strynar.Mark@epa.gov]
FYI,

Those Cl-PFECA chemicals are in the NJ water as well. That paper is in EPA clearance and ready to be submitted as soon as we get the approval. I presented a portion of this work at the SETAC PFAS FTM meeting in Durham, NC last summer and at the ACS meeting in Orlando in 2019.

Hi Mark –

My colleagues on the science desk were supposed to report on that paper. It's really, really interesting and I believe really important.

I am still pushing for coverage of that paper on the novel PFAS in NJ.

Cheers,

Cheryl

Hi Cheryl,

We are doing fine, **Ex. 6 Personal Privacy (PP)**

I suspect you saw our recent *Science* paper about some novel PFAS in NJ. If not here it is.

Mark

Thank you, Mark!

I hope you and your family are well and hanging in there. I'm working from my dining room table and still on the PFAS beat.

Sincerely,

Cheryl
